[24/12/2023 – 17/01/2024]

Smart Watering System

The smart irrigation system, powered by AI and IoT documentation, delivers precise water management for agriculture. Through sensor data and a user-friendly mobile app, clients can remotely monitor and control irrigation, ensuring optimal plant health. This innovative solution offers convenience and efficiency while maximizing water conservation efforts

HOBBIES AND INTERESTS

Full Stack Development

Interest in learning Mern Full Stack development and pursuing my future projects in it.

Running +Cardio

Passionate about running and cardio, I find joy in the rhythm of my steps and the rush of endorphins. Each session energizes me and pushes my limits, fostering a sense of accomplishment and well-being.
